January 16, 2017

Dear Valued Customer:

In July of 2015, MarTek Inc. became the sole owner of all Electroglas Wafer Prober Intellectual Property. For the past year MarTek has allowed existing licensed Electroglas suppliers to continue using our intellectual property to support their customers as MarTek transitioned to an OEM business model.

As of January 1, 2017, all license agreements for Complete Probe Solutions, Boston Semiconductor Equipment, EG Systems LLC, Wava International and ProbeX have either expired or been terminated. Others like EMTS, CSE and Probers Synergy have never been licensed to use our IP and copyrighted materials.

MarTek is taking control of its intellectual property for several reasons, but the main reason is to provide better support and products to our customers.

- Eliminate confusion:
 - A single source so customers will always know who they can contact for Electroglas products and support
- Product Consistency
 - Instead of multiple companies making their own design changes, all changes will come from a single source
- Support for legacy products and development of new products
 - As the owner of the IP, MarTek can continue to support legacy products while developing new products that meet future requirements

If you are not already a MarTek customer, please contact our sales team (sales@martekprober.com) to begin discussions on how MarTek can help with your Electroglas Wafer Prober support.

Thank you for your time and consideration.

Best Regards,

Mark James
President and CEO
