

SMT LEAD FORM & TRIM

Solutions

Gull Wing Tooling

Cost Effective Performance From The Experts

F-1A/4

F-1A

Standard Features

- Standoff controlled with unique wedge design that applies no pressure on the lockable micrometer
- Accurate registration via outside lead frame on Quadpacks for easy part removal
- Lifter mechanism on Quadpacks for easy part removal
- Coplanarity of .004" or better (depending on your parts)
- Use in Fancort's hand or air press
- Connection for ESD protection
- Meets MIL & JEDEC specs

Options

- Integrated corner cutting for devices with metal or non-conductive tie bars
- PLUS manual, semiautomatic, and automatic systems for hand-off processing
- Reforming of quads to correct coplanarity
- Hard Chrome Plating
- Adjustable matrix trays, standoff height checker, and coplanarity inspection mirror
