

Replacement of SCSI Hard Drives in Wafer Probers with Compact Flash Cards

IS-Test has started to replace old **SCSI Hard Drives** in Wafer Probers by modern **Compact Flash Card technology**, producing some substantial benefits for Wafer Prober users:

- Removes typical known weaknesses like happened with “old fashioned” hard disk drives (SCSI)
- Easy to change due to “plug & play” components – no additional software is required
- Less costs & high reliability – it will enhance the OEE significantly
- Much higher reading / writing rates
- Available for APM90A; UF190(A/B); UF200(A); UF200S(A); UF300(A)...
- Standard storage size: 2GB (higher capacities optionally available)
