Introducing the Benchtop Vibration Table

The TCB-1.3 benchtop vibration table is ideal for reliability testing of compact products and electronics. It may be used as a stand-alone vibration table for vibration testing or placed inside an environmental chamber for combined vibration & temperature testing offering flexibility and greater return on investment.

Equipped with an all-axis vibration system, the TCB-1.3 utilizes four pneumatically-actuated vibration hammers providing 6 dof, random vibration with x,y,z axis and roll, pitch and yaw rotation. The chamber comes standard with two accelerometers, one for control and one vibration monitor with a range of 1 to 60 GRMs.

"HALT" - Try Before You Buy

Receive 15% off HALT & HASS testing services for any orders placed through September 30, 2014. When you are ready to buy, receive a discount on your new HALT & HASS test chamber for the same amount you spent on testing.

Friends & Family Discount

Providing a full range of environmental chambers:

- Temperature/
- Humidity
- Stability Chambers
- HALT & HASS
- Thermal Shock
- Altitude
- AGREE Vibration
